The website is not working

Eirene - 2025-10-20 - [Comments \(0\)](#) - [Account/Website](#)

□ If the website is not opening

Access to our website may sometimes be restricted depending on your country or internet provider. You can easily fix this issue by adjusting your VPN settings.

□ What to do:

1. □ Turn on your **VPN** (if you already have one installed).
2. □□ Change your connection country and select a **European country** such as Germany, the Netherlands, Poland, France, or Italy.
3. □ Refresh the website page or reopen it in your browser.
4. □ If the site still does not open, try connecting to another European country — sometimes the first connection may not establish properly.
5. □ Clear your **browser cache and cookies** to remove outdated connection data.
6. □ Try a **different browser or device**, as some browsers may block VPN connections.
